

220 to 110 distribution box

AI Overview

A 220V to 110V distribution box safely converts high-voltage power to multiple 110V outputs, featuring breakers, monitoring, and protection for professional or commercial use.

Overview A 220V to 110V distribution box is designed to convert and distribute 220V power into multiple 110V outlets, allowing safe operation of devices that require standard voltage. These boxes are commonly used in live events, construction sites, industrial settings, and commercial applications where multiple devices need reliable power simultaneously.

Key Features

- Voltage Conversion:** Converts 220V input to 110V output, often with multiple channels for simultaneous device connection.
- Amperage Capacity:** Professional units like the AUVI AVP-PB220 support up to 120A total capacity with 20A breakers per channel, ensuring overload protection.
- Output Channels:** Units may have 6 to 12 channels, depending on the model, allowing multiple devices to be powered safely.
- Safety Protection:** Integrated circuit breakers, leakage protection, and surge protection safeguard both the distribution box and connected equipment.
- Monitoring:** Many boxes include digital displays for real-time voltage and amperage readings, helping users monitor power usage and prevent overloads.
- Portability and Construction:** Lightweight, durable materials such as ABS plastic or stainless steel are used. Some units include carry handles for mobility, while others are wall-mounted.
- Ingress Protection:** Ratings like IP54 or IP65 indicate resistance to dust and water, making them suitable for outdoor or harsh environments.

Types

- Manual Changeover Boxes:** Allow users to manually switch between 220V and 110V outputs.
- Automatic Changeover Boxes:** Detect voltage fluctuations and adjust automatically to maintain continuous operation.
- Hybrid Boxes:** Combine manual and automatic switching for flexibility in diverse environments.

Applications

- Professional Events:** Powering lighting rigs, audio systems, and stage equipment.
- Construction Sites:** Supplying multiple tools and machinery safely.
