

48-core optical cable coupler model

Overview

The optical 48 core splice closures are designed for distributing, splicing, and storing outdoor optical cables. They support direct and splitting connections, suitable for overhead, pipeline, and embedded situations. Material: Made. NG4access[®] Cabled Modules available in all module sizes and fiber counts up to 864 fibers NG4access[®] Splice Tray Four sizes of interchangeable Propel fiber pass-through adapter packs provide the breadth of capabilities for virtually any configuration. Weatherproof or indoor couplers are available. All products' documentation is published in PDF (Portable Document Format), which requires Adobe. Fiber optic splice closure is mainly used for protecting the fiber optic junction between two cables and reserve a section of fiber optic for maintenance in the box. The box has good leak-proof, anti-water and damp-proof feature and its power line is corrosion resistant.
