

800G High-Speed Cable for Broadcast DAC

Overview

This collection features ultra-reliable 800G OSFP and QSFP-DD800 options, including Active Optical Cables (AOC) for long-reach flexibility, Active Copper Cables (ACC) for optimized power consumption, and Direct Attach Copper (DAC) for low-latency, short-range. This collection features ultra-reliable 800G OSFP and QSFP-DD800 options, including Active Optical Cables (AOC) for long-reach flexibility, Active Copper Cables (ACC) for optimized power consumption, and Direct Attach Copper (DAC) for low-latency, short-range. 800G Ethernet DAC cables, as a direct-connection solution based on high-speed copper cabling, are widely used in short-distance connection scenarios within racks and between adjacent racks. With their simple structure, low power consumption, and convenient deployment, DACs provide a cost-effective. The 800G DAC cables deliver cost-effective, ultra-low-latency direct-attach connectivity for high-density data centers and HPC environments. Compatible with common 800G form factors (OSFP and QSFP-DD800), our cables are factory-tested and supplied with EEPROM programming and electrical test reports. FS 1.6T/800G DAC/AOC/AEC cables are compliant with MSA and IEEE standards for guaranteed compatibility and optimal performance and suitable for servers, switches, storage, etc. Purchase from nearby warehouses.
