

Advantages of L-shaped cable tray supports

Overview

The joints of the supports and beams are bypassed with flexible L-channels so that the cables always have a solid, continuous support. Where necessary, the cables can be secured with cable ties or LANZ quick-installers. The L-channel cable trays from LANZ are made of robust steel, with rounded shapes and with a halogen-free polyethylene coating in accordance with IEC 60754-1 / EN 50267-2-1 standards (RAL 7035). The L-channels are attached. Secure Attachment to Walls: Wall L brackets are primarily used to securely attach sections of wire mesh cable trays to the walls of various spaces, including data centers, network closets, and industrial environments. This attachment provides a stable and reliable support structure for the cable. The advantages of implementing cable tray support brackets are numerous: Improved Organization: Brackets help in maintaining orderly arrangements of cables, reducing clutter. Its design is available with many. Our Voluntary 30-Day Return Guarantee does not affect your legal right of withdrawal in any way.
