

Are portable power distribution boxes expensive

AI Overview

Portable power distribution boxes for construction or temporary sites typically range from \$200 to over \$1,000 depending on amperage, phase, and safety features. Price Overview Entry-level portable boxes with basic 16A–32A single-phase outputs and a few outlets generally cost \$200–\$400 on platforms like Amazon. Mid-range units with multiple outlets, 32A–50A capacity, and built-in circuit protection (RCDs, MCBs, or FI switches) are priced around \$400–\$700. Heavy-duty or industrial-grade boxes for 63A–125A, three-phase power, or specialized configurations can exceed \$1,000, especially when designed for harsh outdoor conditions or custom setups.

Key Features Affecting Price

- Amperage and Phase:** Higher amperage (50A–125A) and three-phase units cost more than single-phase, lower amperage boxes.
- Safety Features:** Units with GFCI protection, circuit breakers, and IP-rated enclosures for weather resistance are more expensive.
- Portability and Build Quality:** Boxes with handles, lockable lids, and durable thermoplastic or metal housings suitable for construction sites or outdoor events increase the price.
- Pre-wired vs. Custom:** Fully assembled, ready-to-use units are generally pricier than basic kits requiring wiring.

Examples

- Western 6506TLSX Temp Power Box:** Durable 50A, 125/250V unit, suitable for construction sites, priced around \$400–\$500.
- KOOP Elektro Portable Construction Box:** 32A CEE input, multiple Schuko and CEE outputs, IP44 rated, typically \$500–\$700.
- CEP Rugged Temporary Power Box:** 50A, 125/250V with GFCI protection, designed for heavy-duty jobsite use, price varies by quantity and configuration, often \$600+.

Where to Buy

- Amazon:** Offers a wide range of portable power boxes with customer reviews and shipping options.
- Grainger:** Industrial supplier with real-time availability and 24/7 support for temporary power distribution boxes.
- Specialty Elec...**
