

Australia s Gydt Optical Cable

Overview

GYDTA (metal strengthening member, loose tube stranded and filled with optical fiber ribbon, aluminum-polyethylene bonded sheathed outdoor optical fiber cable for communication) The structure of the optical cable is to sheath the single-mode optical fiber ribbon with the. GYDTA (metal strengthening member, loose tube stranded and filled with optical fiber ribbon, aluminum-polyethylene bonded sheathed outdoor optical fiber cable for communication) The structure of the optical cable is to sheath the single-mode optical fiber ribbon with the. The following takes the GYDTA 192B1. 3 optical cable as an example to talk about the naming of commonly used optical cable models. It is designed with multiple layers of strength members, loose tubes, and an outer. According to their design, ribbon optical cables are intended to have a large number of optical fibers transferred in a small volume, organized, and most efficiently. The key feature of ribbon fiber cables is the flat configuration of the fibers using matrix-style ribbons with either 4, 6, 8, or 12. GYDTA ribbon fiber optic cable is a stranded loose tube outdoor optical cable designed for access networks and high-fiber-count communication applications. Find top brands, exclusive offers, and unbeatable prices on eBay Australia.
