

Bosnia and Herzegovina CE certified hollow fiber optic cable 4 cores

AI Overview

CE-certified hollow fiber optic cables with 4 cores can be legally used in Bosnia and Herzegovina if they comply with EU directives and are approved by the Communications Regulatory Agency (CRA). CE Certification Requirements CE marking ensures that fiber optic cables meet European safety, health, and environmental standards. For hollow fiber optic cables, this includes compliance with the Construction Products Regulation (CPR 305/2011/EU), which governs fire performance, smoke emission, and material safety in building installations, as well as RoHS Directive 2011/65/EU for restricted hazardous substances and ISO IEC 11801 for technical performance in structured cabling systems. CE certification requires a declaration of conformity from the manufacturer and adherence to harmonized standards for attenuation, material quality, and system compatibility. Local Approval in Bosnia and Herzegovina Even with CE certification, fiber optic cables must undergo a national type approval process in Bosnia and Herzegovina. The Communications Regulatory Agency (CRA) in Sarajevo is responsible for assessing conformity with local requirements, which align closely with EU technical specifications. The approval process typically involves submitting CE-compliant test reports and documentation demonstrating compliance with national safety and electromagnetic compatibility standards. Market Availability The Bosnian optical fiber market includes suppliers offering CE-certified cables suitable for telecommunications and civil engineering projects. While specific 4-core hollow fiber optic cables may not always be listed online, companies like TT Cables provide a range of fiber optic products and can supply CE-compliant cables upon request. Market reports indicate steady demand for fiber optic infrastructure in Bosnia and Herzegovina, driven by network expansion a...
