

Botswana sells fiber optic cables at high prices

AI Overview

Fiber optic cable in Botswana typically ranges from around BWP 2,500 to BWP 10,000 per 1000-foot spool, depending on type, strand count, and quality. Typical Pricing Singlemode 6-strand indoor/outdoor fiber optic cable (1000 ft spool) is available for approximately BWP 2,500–3,000 on online platforms like Ubuy, excluding shipping and customs charges. Multimode duplex fiber optic patch cables (1 meter, LC to SC connectors) are commonly sold by local suppliers such as CompuCare, with prices varying based on core size (50/125 micron OM2) and connector type. Shorter patch cables for LAN applications are generally less expensive, often under BWP 200–500 per meter. Factors Affecting Price Cable Type: Singlemode cables are typically more expensive than multimode due to longer-distance transmission capabilities. Strand Count: Higher strand counts (e.g., 12, 24, or 48 strands) increase cost. Length: Longer spools (500–1000 feet) offer better value per meter but require higher upfront investment. Quality and Brand: Premium brands like Corning or CableWholesale provide higher durability and lower signal loss, which can increase price. Installation Accessories: Patch panels, couplers, and connectors add to overall cost if purchased together. Local Suppliers CompuCare (Gaborone) – Offers multimode and singlemode patch cables, enclosures, and couplers. Ubuy Botswana – Provides imported singlemode fiber optic spools with online ordering and delivery. Other local distributors – Several companies in Gaborone and Palapye supply network cabling and fiber optics, including consulting and installation services. Market Trends The Botswana fiber optic market is growing, with increasing demand for high-speed data infrastructure. Prices may fluctuate slightly due to import costs, exchange rates, and market demand, but the range above reflects typical retail cos...
