

Can you pick up fiber optic cables on the roadside

Overview

Free services like 811 only mark public utilities, not private lines like septic systems or private fiber optic cables. Fiber optics are harder to find. They don't carry electricity, so special tools like ground-penetrating radar (GPR) are needed to locate them. Always locate. Damaging fiber optic cables, gas lines, or water pipes can cause costly repairs and safety risks. Public utility marks aren't enough. They don't. Our field technicians plan a route to run the fiber from the street to the side/front of your home. The fiber is buried in your yard, which we describe as "future-proofing. Take a picture of the cables at pole and post it and what state you live in, someone may be able to help that way Most of the fiber optic cables have a tag at each pole stating that they are a fiber optic. Underground cables are pulled in conduit that is buried underground, usually 1-1.2 meters (3-4 feet) deep to reduce the likelihood of accidentally being dug up. I have validated this with coworkers who used to work for the 'local' internet. In this guide, you'll learn what fiber cable actually is, what's inside, how to prep scrap and spools without creating a mess, and which recycling option makes the most sense for a small box vs full pallets. If your cleanup includes mixed telecom gear (cable, patch cords, small devices, rack.
