

China Unicom Fiber Optic Connector Price

AI Overview

China Unicom fiber optic connectors typically range from \$1 to \$10 per unit, depending on type, length, and supplier, with bulk orders offering lower per-unit costs.

Pricing Overview The cost of China Unicom-compatible fiber optic connectors varies based on connector type, application, and purchase volume. Common connector types include SC, LC, ST, and MTP, suitable for single-mode and multi-mode cables. Standard field-installable connectors, such as the L925B Fiber Mechanical Splice, are priced around \$5–\$10 per unit for individual purchases, offering low insertion loss (0.2dB) and reusable assembly for multiple splices. Bulk orders or wholesale purchases can reduce the per-unit cost to \$1–\$3, depending on supplier and order size.

Purchase Options

- Alibaba and Made-in-China:** Offer a wide range of fiber optic connectors with wholesale pricing and customization options. Buyers can select connectors by type, length, and environmental specifications.
- AliExpress:** Provides cost-effective, durable connectors compatible with China Unicom standards, suitable for residential and commercial FTTH installations.
- DHgate:** Features field-installable quick connectors and mechanical splices with low loss and high return loss, ideal for rapid deployment and maintenance.

Considerations for Selection When choosing a connector, consider:

- Connector type (SC, LC, ST, MTP) for compatibility with existing network equipment
- Single-mode vs. multi-mode for transmission requirements
- Environmental conditions (indoor, outdoor, aerial, or duct installation)
- Bulk vs. individual purchase to optimize cost efficiency

Summary For most China Unicom fiber optic installations, individual connectors cost \$5–\$10, while bulk orders can reduce the price to \$1–\$3 per unit. Online marketplaces like Alibaba, Made-in-China, AliExpress, and DHgate provide a variety of options, including high-quality, reusable, and field-installable connectors suitable for FTTH, 5G, and LAN applications.
