

Complete set of low-voltage distribution box equipment

Overview

This solution covers a complete set of power equipment from low-voltage distribution cabinets, high-voltage switchgear to transformers, automation control systems, etc., aiming to provide comprehensive and customized power solutions for various users. GGD is a Fixed Complete-set Switchgear Equipment with simply and flexibly. Low voltage distribution system: We use. A Low Voltage Complete Set Distribution Cabinet is a fully integrated electrical system designed to safely and efficiently distribute power in commercial, industrial, and residential environments. Was established in 2009 and is located in Foshan, the national manufacturing capital. The company specializes in the production, R&D and technological innovation of low-voltage switchgear, with products covering low-voltage switchgear, firefighting. It is used for motor centralized control and capacitance compensation of power and distribution in power generation and supply system of three-phase AC 50Hz, rated working voltage 400V (690V), rated current 4000A or less.
