

Door-to-door cold aisle transport in the Netherlands IP65

AI Overview

The Netherlands offers a robust network of door-to-door cold chain transport providers capable of handling IP65-level temperature-controlled shipments for chilled and frozen goods. Key Providers and Services

Cool Runnings specializes in door-to-door refrigerated distribution and temperature-controlled courier services across the Netherlands and Flanders. They offer split-temperature vehicles for chilled and frozen products, maintain an unbroken cold chain, and provide ISO 22000:2005 hygiene-certified operations, ensuring reliable last-mile delivery for food, farm produce, and laboratory products. Jansen Logistics provides comprehensive services including cooled and frozen transport, storage, repackaging, and order management. They operate scheduled services across Europe and maintain flexibility for high-value or sensitive shipments, ensuring temperature integrity throughout the supply chain. Froster focuses on frozen food logistics with a 30,000-pallet capacity warehouse and its own distribution network. They offer customized transport solutions, order picking, and real-time stock management, supporting both domestic and international door-to-door delivery. NewCold operates highly automated, energy-efficient warehouses and a growing transport fleet, providing fully closed cold chain solutions with 24/7 monitoring and end-to-end temperature integrity. Their services are suitable for large-scale, high-value, or sensitive shipments requiring strict compliance. Door to Door Cargo Care offers dedicated transport with guaranteed collection and delivery times, including high-tech, medical, and fashion transport, emphasizing security and temperature control for sensitive cargo. Cold Chain Standards and Compliance

In the Netherlands, cold chain logistics typically maintain the following temperature bands: Fresh produce: 0–4°C Chilled meats and dairy: 2–8°C Frozen goods: –18°C or...
