

Dual-port information panel port identification

Overview

Port identification can be accomplished in two ways: use different color QUICKPORT connectors for port or station differentiation, or type or hand-write a descriptive label for the designation window. But today we are specifically introducing a dual-port information socket, which is mainly used in conjunction with computers. As the name implies, it can. ontal single gang and 8 port double gang. Ultimate ID Faceplates shall comply with the latest TIA-606-B labeling standard b providing various labeling capabilities. Executive. Signamax™ Printable Label Sheets for patch panel or wallplate port identification offer professional installers and network technicians a quick and very affordable alternative to specialized and/or expensive label printers. IEC 60297 / EIA. All ports on patch panels and all positions on termination blocks shall be labelled with the corresponding port number or position number and optionally with additional identifier fields as practicable.
