

Electric Meter Distribution Box Accessories

AI Overview

Electric meter distribution box accessories include doors, covers, keys, hockey sticks, backplates, and repair kits to ensure secure, compliant, and durable installations.

Key Accessories

- 1. Meter Box Doors and Covers** Replacement doors and covers are essential for maintaining security and weather protection. They are typically lockable, made from weather-resistant GRP, fire-retardant, and UV-stable materials, and often come with stainless steel hinges. Doors can be left- or right-hinged depending on installation requirements, and replacement doors usually include the latch, hinges, and a meter box key for convenience and compliance.
- 2. Meter Box Keys** Keys are used to secure the meter box and prevent unauthorized access. Many suppliers provide DNO-approved keys compatible with standard UK electric meter boxes, ensuring safety and regulatory compliance.
- 3. Hockey Sticks (Cable Entry Conduits)** Hockey sticks are conduits that guide service cables safely from the ground into the meter box. They help protect cables from damage and maintain a tidy installation. These are available in various sizes to match single-phase or three-phase meter setups.
- 4. Backplates and Frames** Backplates provide a solid mounting surface for meters and associated components, ensuring a secure and organized installation. Frames and riser covers can also be used to protect internal wiring and support professional setups.
- 5. Repair Kits and Replacement Parts** Repair kits include replacement latches, hinges, and vandal-resistant over-box covers. These accessories allow for maintenance without replacing the entire meter box, extending the lifespan of the installation.

Installation Options

- Recessed Meter Boxes:** Installed flush with walls for a neat, integrated appearance.
- Surface-Mounted Meter Boxes:** Easier to retrofit on existing walls, providing quick access for maintenance.
