

Energy Big Data Center Project Proposal

Overview

The proposed 19,150-hectare Project Ares would be built by Energy North on Murraraji Station in the Barkly Region, and consist of about 90 hectares of "data halls," powered by a blend of gas and solar energy infrastructure. Xcel Energy has filed a rate proposal with Wisconsin utility regulators that would require data centers to pay all costs tied to their projects. The utility filed an application Monday with the Public Service Commission. Specifically, OpenAI is seeking Site (land and power) proposals. The objective is to establish multi-gigawatt infrastructure fleet capacity that. Designing Data Centers of the Future is one of the first frontier areas for exploration launched by the MIT Climate Project in 2025 through a Request for Proposals issued to MIT faculty and principal investigators.
