

Ethiopia Lighting Distribution Box Specifications

AI Overview

Ethiopian lighting distribution boxes, such as XRM and XL-21 types, are designed for secondary power distribution with rated voltages up to 400-500V and load currents from 100A to 630A, suitable for industrial, commercial, and residential applications.

XRM Lighting Distribution Box The XRM lighting distribution box is a lightweight, fully enclosed device used for secondary distribution in industrial, mining, and building applications. Key specifications include:

- Voltage and Frequency:** AC 50/60Hz, rated voltage up to 400V
- Current Rating:** Load current not exceeding 100A
- System Compatibility:** Single-phase three-wire or three-phase five-wire systems
- Enclosure Features:** Fully enclosed with surface-mounted measuring instruments, control switches, buttons, and signal indicators for monitoring and operational efficiency
- Protection:** Provides overload, short-circuit, and leakage protection
- Applications:** Hotels, residential buildings, industrial and mining enterprises, high-rise buildings, stations, hospitals, schools, and government offices

XL-21 Power Distribution Cabinet The XL-21 low-voltage power distribution cabinet is a more robust indoor wall-mounted unit suitable for higher load applications. Its specifications include:

- Voltage and Frequency:** AC 50-60Hz, voltage below 500V
- Current Rating:** Load currents below 630A
- System Compatibility:** IT, TN-C, and TT systems (single-phase and three-phase)
- Operating Environment:** Ambient temperature -5°C to +40°C, altitude $\leq 2000\text{m}$, relative humidity $\leq 50\%$ at 40°C
- Structure:** Bent steel plates with welded angle steel, front door with operation buttons, indicator lights, and display instruments
- Protection Devices:** Air circuit breakers, fuses, contactors, and thermal relays
- Safety Features:** Grounding screws on door and enclosure, knife switch for power disconnection
- Standards Compliance:** IEC...
