

Guardrail around the distribution box

Overview

To reduce these risks there are a variety of protective industrial guarding solutions available, including wire mesh partitions, machine guarding, bollards, guardrails, and other physical barriers that can be installed around electrical panels and cabinets. We know how difficult it can be to maintain the 36" or more of clearance required by OSHA in front of your electrical panels. Even when the floor is clearly marked, carts, boxes and other miscellaneous items end up being left in the restricted area. That is why many of our clients have added. Installing our guard rails around shipping areas, dock doors, offices, picking locations, and machinery will protect your workers and equipment from costly damage. Common shapes are flat, rounded edge, and tubular in horizontal. YoAhorroEnergia Data Infrastructure (YAE) delivers modular data centers, edge data centers, server rack systems, cold/hot aisle containment, EMS, smart PDU, and AC/DC distribution solutions for Africa and Europe.
