

H3 optical module

Overview

Optical modules transmit signals over optical fibers. The Huawei OptiXaccess EA5801E is a box-shaped Optical Line Terminal (OLT) with Gigabit Passive Optical Network (GPON) access, supporting both Passive Optical LAN (POL) and Fiber To The Home (FTTH) solutions. It carries all services over a single fiber network, considerably simplifying network. The OptiXaccess EA5801E-GP08-H3 is a small-sized box-shaped OLT. It supports a link distance of 10km to 20km on SMF fiber, or 550m on MMF fiber (need to be used along with mode conditioning patch cable). This 1G SFP transceiver complies with. This H3 SFP-XG-LX-SM1310 compatible SFP+ transceiver supports 10GBase-LR and 10GBase-LW throughput up to 10km over single-mode fiber (SMF). It operates at a 1310nm wavelength and features an LC duplex connector.
