

How much does a steel fireproof cable tray cost

AI Overview

The price of steel fireproof cable trays typically ranges from \$10 to \$50 per meter, depending on material, size, coating, and supplier.

Price Range and Factors Steel fireproof cable trays, often made from galvanized steel, are priced based on length, width, side rail height, and surface finish. Standard lengths range from 2 to 6 meters, with widths from 50 mm to 150 mm and side rail heights from 10 mm to 100 mm. The average market price per meter for steel cable trays is \$2 to \$25, but fireproof or powder-coated trays designed for heavy loads and fire resistance can cost \$10 to \$50 per meter. Bulk orders may reduce the per-unit cost.

Standard Units Many suppliers sell cable trays in standard lengths of 2.4 meters or 2-6 meters. Prices for fittings or accessories are usually calculated per piece, separate from the tray itself. Maximum working loads for fireproof trays can reach 200 kg, which may influence pricing.

Additional Cost Considerations Coating and finish: Hot-dip galvanization, powder coating, or HDG increases durability and price. Type of tray: Ladder trays are more expensive than perforated or wire mesh trays due to higher load capacity. Shipping and installation: Heavier trays incur higher transport costs, and labor costs vary by region.

Example Pricing Alibaba fireproof galvanized steel tray: 2-6 m lengths, widths 50-150 mm, side rail heights 10-100 mm, price negotiable depending on quantity. Hot-dip galvanized ladder tray: Standard 2.4 m length, price varies by supplier and region.

In summary, for budgeting purposes, expect \$10-\$50 per meter for steel fireproof cable trays, with final costs influenced by size, coating, load capacity, and order quantity. For precise quotes, contacting suppliers directly is recommended, especially for bulk or project-specific orders.
