

# How much does an upgraded fiber optic splice box cost

## AI Overview

A typical fiber optic splice box costs between \$20 and \$200, depending on capacity, type, and brand. Price Range Overview Small wall-mount splice boxes for 6–12 fibers generally cost \$20–\$50 on platforms like Amazon and eBay. Medium-capacity boxes supporting 24–48 fibers typically range from \$50–\$100, suitable for network rooms or MPOE installations. High-capacity splice closures for 72–144 fibers, often used in FTTH or outdoor applications, can cost \$100–\$200 or more, depending on features like gel sealing, multiple cable attachments, and fusion splice capacity.

Factors Affecting Cost

- Capacity:** Higher fiber core capacity increases the price. A 12-core box is cheaper than a 144-core box.
- Type:** Wall-mount enclosures are generally less expensive than outdoor or pole-mount closures with weatherproofing.
- Brand and Quality:** Established brands like Graybar or FiberNext may charge more for durability and warranty.
- Features:** Additional features such as LC couplers, gel sealing, or modular trays for fusion splicing can increase cost.

Buying Tips

- Compare prices across Amazon, eBay, and specialized distributors to find the best deal.
- For bulk purchases or high-capacity boxes, consider Alibaba or industrial suppliers, which may offer lower per-unit costs.
- Check for compatibility with your fiber type (single-mode or multimode) and installation environment (indoor vs. outdoor).

In summary, a popular fiber optic splice box typically costs \$20–\$200, with the exact price depending on capacity, type, and additional features. For precise pricing, check the product listings or request a quote from distributors.
