

How much does one meter of 8-core outdoor optical cable cost

AI Overview

The price of an 8-core outdoor optical fiber cable typically ranges from \$0.37 to \$1.50 per meter, depending on specifications and purchase volume.

Price Range and Factors

Wholesale/retail pricing: On Alibaba, 8-core fiber optic cables start at \$0.37 per meter for bulk purchases, making it suitable for large-scale projects.

Standard pricing guides: Fiber optic cables for outdoor use generally cost \$0.05 to \$1.50 per meter, with armored or weather-resistant cables at the higher end.

Manufacturer datasheets: Specific 8-core GYTC8S figure-8 self-supporting outdoor cables, designed for aerial or duct installation with steel-wire strength members and water-blocking features, are typically priced within this range, though exact quotes depend on supplier and order quantity.

Influencing Factors

Cable Construction: Armored cables or those with figure-8 self-supporting design cost more due to enhanced tensile strength, crush resistance, and environmental protection.

Fiber Type: Single-mode fibers (OS2) are slightly cheaper per meter than multimode fibers (OM3/OM4), but multimode may be preferred for short-distance, high-bandwidth applications.

Environmental Rating: Outdoor cables with PE jackets, UV resistance, or direct-burial capability are priced higher than indoor-rated cables.

Volume and Supplier: Bulk orders reduce per-meter cost, while small retail purchases or pre-terminated assemblies increase it.

Summary

For an 8-core outdoor optical fiber cable, expect a per-meter cost between \$0.37 and \$1.50, with armored, self-supporting, or high-performance variants at the upper end. Always confirm with suppliers for exact pricing based on fiber type, cable construction, and order quantity to get the most accurate estimate.
