

# How to connect a 30-channel fiber optic switch

## Overview

Most modern fiber-enabled network switches require an SFP transceiver module featuring a duplex (two strand) multimode OM3 or duplex single mode OS2 connection with LC connectors. Direct attach cables with pre-terminated SFP connections may also be used. Download the Application. Fiber optic cabling is increasingly used to connect network switches and other datacom equipment, especially in long-distance and mission-critical applications. Fiber provides: Increased internet signal bandwidth. A practical B2B. Connecting a fiber optic switch involves several steps, ensuring compatibility between the switch's ports and the fiber optic cable. The Fibre Channel expansion module contains eight Fibre Channel interfaces. There are no specific requirements for this document.
