

Indonesia's network security equipment SFP

Overview

The Direktorat Jenderal Sumber Daya dan Perangkat Pos dan Informatika (SDPPI) of Indonesia has updated requirements for products with Small Form Factor Pluggable (SFP) Ports, which includes devices such as routers, ethernet switches, gateways, and firewalls. Driven by the "Making Indonesia 4.0" initiative and the massive expansion of the Palapa Ring national fiber-optic backbone, the demand for reliable 10G/16G SFP+ modules has surged. As the largest digital economy in Southeast Asia, Indonesia requires a robust supply chain for high-speed transceivers. Indonesia's optical network equipment market is forecast to grow at a compound annual rate of 12-15% from 2026 to 2035, reaching an estimated value of USD 2. Those products which are in the scope of KM KOMINFO.
