

Installation of Distribution Boxes and Cabinets in Gabon

AI Overview

Distribution boxes and cabinets in Gabon are installed following precise technical procedures to ensure safety, reliability, and compliance with local electrical standards.

Types of Distribution Boxes and Cabinets

- Surface-Mounted Distribution Boxes:** These are fixed on walls or iron frames. Installation involves measuring dimensions, cutting and bending metal panels, drilling holes for metal expansion bolts, and applying anti-rust paint before final assembly ().
- Recessed Distribution Boxes:** Installed within wall voids, these require leveling, cement mortar filling, and careful plastering to avoid covering the box panel ().
- Low and Medium Voltage Cabinets:** Used for residential, commercial, and industrial applications, including transformer substation connections and auxiliary services ().

Installation Procedure

- Positioning:** Determine the exact location using string positioning or measurement tools.
- Fixing:** For surface-mounted boxes, use metal expansion bolts; for recessed boxes, ensure proper leveling and mortar filling.
- Electrical Connections:** Connect incoming and outgoing circuits according to the design, ensuring correct breaker and residual current device (RCD) placement.
- Safety Checks:** Verify voltage, resistance, and dielectric loss to prevent leakage, cascading tripping, or power outages ().
- Ventilation and Protection:** Cabinets often include labyrinth ventilation systems and fiberglass-reinforced housings to protect against environmental factors ().

Local Providers and Services

- SOGAFRIC SERVICES:** Offers design, installation, maintenance, and troubleshooting of low and medium voltage distribution systems in Gabon and Central Africa ().
- EcogreenPlus and BOSSELEC:** Provide professional installation of distribution boards, lighting panels, and construction site power distribution units ().
- Suppliers:** Companies like Metall Meister Grimma GmbH and Si...
