

Low-loss fiber optic connectors for security applications

Overview

E2000 connectors have become the preferred standard for security-critical applications, as their unique design with integrated protective shutter and attenuation values below 0.15 dB ensure maximum operational safety. After. The UltraL™ Ultra Low Loss fiber optic connectors and patch cables achieve exceptionally low coupling loss, enabling the development of next-generation quantum systems and ultra-low-loss optical networks. The outstanding performance (<0.05 dB when mated as a pair) is achieved through a. This product has multiple variants. The options may be chosen on the product page. The E-2000® connector, invented by DIAMOND, delivers unmatched reliability and precision in fiber-optic interconnects - making it the ideal choice for critical transmission points across telecom, industrial, medical, and more applications. Featuring an angled physical contact (APC) polish at 8 degrees, these connectors are purpose-built for.
