

# Nan Ya Pigtail Channel Company

## AI Overview

Nan Ya Pigtail Channel products are part of Nan Ya Plastics Corporation's extensive plastic pipe and channel manufacturing operations, specializing in PVC and other plastic materials.

**Company Overview** Nan Ya Plastics Corporation, founded in 1958 by industrialist Yung-Ching Wang, is a leading Taiwanese manufacturer of plastics, polyester fibers, and electronic materials, and is part of the Formosa Group . The company operates globally, including subsidiaries in the US, China, and Indonesia, and is recognized as one of the largest producers of secondary plastics and polyester fibers worldwide .

**Plastic Pipe and Channel Production** Nan Ya's plastic pipe division, which includes pigtail channels, focuses on PVC pipes and related plastic channels used in construction, electrical, and industrial applications . The Chiayi Plant, established in 1980, has continuously upgraded its equipment to ensure high-quality production, personnel safety, and automated monitoring of extrusion and mixing processes . The plant's monthly production capacity has grown significantly since its early operations, reflecting the company's commitment to scale expansion and quality enhancement .

**Technology and Innovation** Nan Ya emphasizes research and development, with specialized technology teams for each product line and a professional market development team to innovate and improve products . The company integrates digital transformation and big data analytics to optimize production processes, enhance product quality, and support downstream industries . This includes environmentally conscious practices and sustainable operations in line with corporate social responsibility principles .

**Applications** Nan Ya's pigtail channels and PVC products are widely used in:

- Electrical wiring and cable management
- Construction and building materials
- Industrial and infrastructure projects
- Furniture, vehicles, and packaging applications

**Corporate Philosophy** The company follows the founders' principles of "Industrious and Simple, Infinite and Pe...
