

Pigtail Cable Panel

Overview

They are the bridge between fiber optic cables in the field and the equipment or patch panels that manage them. By combining factory-installed connectors with spliced bare fiber, pigtails ensure that network installers can create fast, reliable, and cost-effective terminations. These cables utilize 900 μm tight buffered construction for rapid installation. AFL's pigtail assemblies help eliminate labor-intensive field termination, yet guarantee reliable performance. Featuring a unified construction.

□SC Fiber Optic Kit Panel□Wall Mount Fiber Enclosure with Spool 6 Strands SC Pigtail SingleMode 9/125; Dimension 255mm*130mm*40mm, Can be mounted vertically or horizontally;The kit provides optimum protection, keeps your fiber distribution organized when space is limited and maintains the integrity. Corning closet connector housing (CCH) pigtail panels are CCH panels (CCH-CP) with factory-terminated and -tested pigtails installed. Depending on. Use Fiber pigtails when you splice.
