

Price of 2-core optical fiber junction box

AI Overview

The price of a 2-core fiber optic junction box typically ranges from \$5 to \$20 per unit for standard indoor models. Pricing Overview Indoor FTTH 2-core junction boxes designed for wall or surface mounting generally cost around \$5–\$15 per unit, depending on brand, material, and included ports (SC/LC) (TopFiberBox). Flush-mounted fibreglass boxes with 2-core capacity and SC panel protection are slightly higher, often \$10–\$20, due to enhanced durability and dust/water resistance (Amazon.de). Alibaba bulk options for 2-core FTTH terminal boxes start at \$5–\$10 per unit for orders of 1,000 pieces or more, with customization options available for logos and packaging (Alibaba). Key Features Affecting Price Material: ABS plastic is common for indoor boxes, offering durability and impact resistance, while fibreglass or reinforced plastic provides higher protection. Connector Compatibility: Most 2-core boxes support SC simplex or LC duplex adapters, which can slightly influence cost. Installation Type: Surface-mounted boxes are generally cheaper than flush-mounted models due to simpler installation. Additional Features: Cable management, splicing support, and multi-fiber capacity can increase the price. Recommendations For residential or small office FTTH installations, a standard ABS 2-core surface-mounted box is cost-effective and sufficient. For commercial or high-durability needs, consider fibreglass flush-mounted boxes with dust and water protection. Bulk purchases can significantly reduce per-unit cost if ordering from suppliers like Alibaba. By considering these factors, you can select a 2-core fiber optic junction box that balances price, durability, and installation requirements.
