

Price of 288-core optical cable in New Zealand

AI Overview

The price of a 288-core optical fiber cable in New Zealand varies widely depending on manufacturer, type, and quantity, typically ranging from NZD 5,000 to NZD 15,000 per kilometer, with exact pricing available via supplier quotes.

Overview A 288-core optical cable is a high-density fiber optic cable used in large-scale telecommunications, data centers, and backbone networks. These cables can be single-mode or multi-mode, with single-mode preferred for long-distance, high-bandwidth applications, and multi-mode for shorter distances like LANs or data centers. The cable's construction, such as loose tube, tight-buffered, or FlexTube® micromodule designs, affects both performance and cost.

Suppliers in New Zealand

- Prysmian:** Offers high-density FlexTube® and Minism@rt cables suitable for 288-core configurations. Pricing is typically provided on request due to project-specific requirements.
- element14:** Stocks a wide range of fiber optic cables and can provide fast quotes and delivery, but 288-core cables usually require a custom order.
- Mouser Electronics:** Provides fiber optic cables from multiple manufacturers with online pricing for smaller quantities, but high-core-count cables often need a direct quote.
- RS NZ and PBTech:** Offer standard fiber optic cables for networking and data centers, but 288-core cables are generally not listed with fixed prices and require contacting sales for a quote.

Pricing Considerations

- Length:** Prices are usually quoted per kilometer. Longer runs may reduce per-meter cost.
- Cable Type:** Single-mode cables are generally more expensive than multi-mode.
- Sheath Material:** LS0H (Low Smoke Zero Halogen) or PE (Polyethylene) sheaths affect cost.
- Installation Method:** Direct burial, duct installation, or aerial deployment can influence total project cost.
- Quantity:** Bulk orders often receive discounts.

How to Obtain a Quote For a precise quote, contact suppliers directly with detailed project specifications.
