

# Price of 48-core optical cable bundling method

## Overview

For 48-core OPGW cables, recent market data (over the past year) shows consistent price clustering between USD \$5.56 per meter, with bulk orders ( $\geq 10$  km) reliably landing near \$6. What matters most isn't chasing the lowest unit price—it's verifying fiber count accuracy. YoAhorroEnergia Data Infrastructure (YAE) delivers modular data centers, edge data centers, server rack systems, cold/hot aisle containment, EMS, smart PDU, and AC/DC distribution solutions for Africa and Europe. The price and performance of these cables vary significantly based on their type, construction, and intended application. Each 48 fiber breakout cable contains LC, SC, or ST pre-terminated connectors, as well as Single-mode (OS2) or Multimode (OM1, OM2, OM3, & OM4) fiber specifications. Singlemode Multi Purpose Breakout Fiber Optic Cable uses simplex cable (900um tight buffer fiber, aramid yarn as strength member) as subunit. A FRP locates in the center of core as a non-metallic strength member.
