

Price of 8-way cable tray

AI Overview

The price of an 8-way cable tray typically ranges from \$50 to \$200 per straight section, depending on material, length, and supplier.

Overview An 8-way cable tray usually refers to a tray with an 8-inch width, often in wire mesh or basket style, designed to support and organize multiple cables in commercial or industrial installations. These trays are made from materials like steel, stainless steel, or aluminum, and may be galvanized or powder-coated for corrosion resistance.

Price Factors

- Material:** Stainless steel trays are more expensive than galvanized steel or aluminum.
- Length and Section Type:** Standard straight sections (typically 10 feet) cost less than custom bends, tees, or elbows.
- Supplier and Brand:** Premium brands like CABLOFIL or Grainger may charge higher prices, while bulk orders from distributors can reduce per-unit cost.
- Shipping and Handling:** Large trays may incur additional shipping fees due to size and weight.

Typical Price Range

- Wire mesh 8-inch trays: \$50-\$120 per straight section
- High-quality or stainless steel trays: \$150-\$200 per section
- Fittings and accessories (tees, elbows, connectors): \$20-\$80 each

Purchasing Tips

- Check suppliers like Grainger, McMaster-Carr, RS Components, or Ekabel24 for current stock and shipping options.
- Consider buying complete systems including straight sections and fittings to ensure compatibility.
- For large installations, request bulk pricing or quotes from distributors to reduce costs.

By considering these factors, you can estimate the total cost for an 8-way cable tray system and plan your installation budget effectively.
