

# Price of Indoor Electrical Distribution Box Switches

## AI Overview

Indoor electrical distribution box switches typically range from \$5 to \$50 per unit, depending on size, material, and IP protection class. Price Range and Factors Basic flush-mounted switch boxes for indoor use generally cost \$5–\$15 per unit, suitable for standard residential installations. Surface-mounted boxes or slightly larger junction boxes with better insulation and flame-retardant ABS material can range from \$10–\$25. High-end or IP-rated boxes (e.g., IP54 for humid areas or IP65 for dust and water resistance) are priced around \$20–\$50, reflecting enhanced protection and durability. Material and Protection Most indoor boxes are made of ABS plastic, which is flame-retardant, corrosion-resistant, and well-insulated. IP20–IP30 is common for standard indoor use, while IP54–IP65 is used in areas with moisture or dust exposure. Accessories and Packs Many suppliers sell boxes in bulk packs, which can reduce the per-unit cost. For example, a pack of 25 flush-mounted switch boxes may cost around \$50–\$60, effectively lowering the unit price to \$2–\$3. Accessories like spring covers, screws, and plaster adjustment rings are often sold separately, adding \$1–\$5 per item depending on type and quantity. Where to Buy Amazon offers a wide selection of indoor distribution boxes with varying sizes, IP ratings, and materials, with prices starting from \$5. Kopp provides specialized indoor switch boxes and accessories, including cavity wall boxes and spring covers, with detailed pricing for bulk packs. Intratec Shop and other European suppliers offer a broad range of distribution boxes for residential and commercial projects, though specific prices may vary by model and region. In summary, the cost of indoor electrical distribution box switches depends on size, material, IP rating, and quantity purchased, with typical prices ranging from \$5 for basic units to \$50 for high-protection or specialized boxes.
