

Price of Outdoor Ground-Mounted Distribution Boxes

AI Overview

Outdoor ground-mounted distribution boxes typically range from \$100 to over \$1,000 depending on size, material, and features.

Price Range and Factors

The cost of outdoor distribution boxes varies widely based on specifications and intended use. Standard residential units often start around \$100–\$300, while commercial or industrial-grade boxes with higher amperage, multiple circuits, and advanced safety features can exceed \$1,000. Weather-resistant enclosures designed for outdoor installation generally carry a premium due to their corrosion-resistant materials, waterproofing, and compliance with NEMA or IP ratings. Key factors influencing price include:

- Material:** Plastic, polycarbonate, aluminum, or steel; metal boxes are more durable and often more expensive.
- Size and capacity:** Larger boxes with more circuits or higher amperage ratings cost more.
- Features:** Hinged covers, knockouts, pole or ground mounting, integrated breakers, surge protection, and smart monitoring systems increase cost.
- Customization:** Special labeling, integration with building management systems, or unique mounting configurations can add to the price.

Where to Buy

Home Depot offers outdoor breaker boxes starting at lower residential prices with options for in-store pickup or delivery. Amazon and specialty suppliers like Floor Box Outlet provide heavy-duty, raintight ground boxes suitable for construction sites or outdoor landscapes, often ranging from \$200–\$800 depending on configuration. Polycase and other industrial suppliers offer boxes with NEMA/IP ratings, multiple material options, and sizes for professional installations.

Summary

For a typical outdoor ground-mounted distribution box:

- Residential/basic units: \$100–\$300
- Mid-range commercial units: \$300–\$700
- High-end industrial or customized units: \$700–\$1,500+

Selecting the right box requires balancing durabili...
