

Price of US Electrical Distribution Boxes and Power Cabinets

AI Overview

Electrical cabinets and distribution boxes in the U.S. range from \$0.50 for basic interior boxes to \$7,000 for high-capacity main panels, depending on type, material, and installation complexity.

Electrical Boxes and Cabinets

Residential electrical boxes vary widely in price based on size, material, and features. Basic single-gang plastic interior boxes cost \$0.50–\$2 for materials, with labor adding \$40–\$140 for installation. Mid-range metal 2-gang boxes with a switch typically cost \$4–\$12 for materials, with total project costs of \$60–\$270 including labor. Premium outdoor weatherproof boxes with multiple devices can cost \$15–\$40 for materials, with total installed costs ranging \$225–\$540. Electrical cabinets, such as wall-mounted server or network enclosures, are available in various sizes and load capacities. For example, a VEVOR 6U wall-mount cabinet with IP65 waterproof rating and ventilated design is suitable for indoor/outdoor use, with prices varying depending on size and features. McMaster-Carr offers over 2,600 electrical cabinet products, with pricing influenced by material, style, and accessories.

Distribution Boxes

Distribution boxes serve as central hubs for power distribution, housing circuit breakers, fuses, and switches. Prices depend on voltage rating, amperage, number of circuits, material, and safety features. Standard residential single-phase units are generally more affordable, while commercial or industrial three-phase systems with advanced monitoring and weatherproofing can be significantly more expensive. Outdoor-rated, corrosion-resistant, or smart-enabled distribution boxes carry premium pricing due to durability and integrated energy management features.

Main Panels and Service Boxes

For main electrical panels, costs are higher due to amperage and circuit capacity. Typical residential panel replacements (100–200A) range \$2,500–\$4,000 including labor and materials...
