

Price of cable tray bends in Malaysia

AI Overview

Cable tray bends in Malaysia typically range from RM 50 to RM 200 per piece, depending on material, size, and type.

Pricing Overview

The cost of cable tray bends in Malaysia varies based on several factors:

- Material:** Galvanized steel, stainless steel, and aluminum are common. Galvanized steel is generally the most affordable, while stainless steel is more expensive due to corrosion resistance and durability.
- Size and Type:** Standard bends (e.g., 45° or 90°) for ladder-type or perforated trays cost less than custom or adjustable bends. Larger widths (e.g., 300mm or above) increase the price.
- Finish:** Epoxy-coated or PVC-coated bends are slightly more expensive than plain galvanized steel due to added protection against moisture and corrosion.
- Supplier Options**

MYToolHub offers a variety of cable trays and bends at affordable prices suitable for commercial and industrial projects. SAN Engineering provides high-quality hot-dip galvanized and corrosion-resistant bends, meeting local and international standards, ideal for long-term installations. IEP Sdn. Bhd. supplies adjustable bends and quick-fit couplers, which simplify installation and may affect pricing depending on customization. Array Metal is another reliable manufacturer with competitive pricing and a wide range of cable support systems.

Practical Considerations

Prices quoted by suppliers often exclude transportation and installation fees, so it is advisable to request a full quotation including delivery. For large projects, bulk purchases may reduce the per-piece cost. Ensure bends comply with NEMA VE standards for safety and durability. In summary, for standard cable tray bends in Malaysia, expect RM 50–200 per piece, with variations depending on material, size, and finish. Contacting suppliers directly will provide the most accurate and up-to-date pricing for your specific project requirements.
