

# Price of cable trays installed on exterior walls

## AI Overview

Outdoor wall-mounted cable trays typically range from \$15 to \$120 per meter, depending on material, size, and load capacity. Pricing Overview The cost of outdoor cable trays varies significantly based on material, design, and supplier location. Common materials include:

- Galvanized steel:** Durable and corrosion-resistant, ideal for general outdoor use. Prices typically range from \$20 to \$60 per meter for standard ladder or perforated trays.
- Stainless steel:** Suitable for highly corrosive environments, such as coastal areas or chemical plants. Prices are higher, generally \$50 to \$120 per meter.
- Aluminum:** Lightweight and corrosion-resistant, often used for medium-load applications. Prices are usually \$25 to \$80 per meter.
- Plastic or GRP (Glass Reinforced Plastic):** Used in wet or weight-sensitive installations, typically \$15 to \$50 per meter.

**Factors Affecting Price**

- Tray Type:** Ladder-type trays with rungs for heavy cables cost more than perforated or mesh trays designed for lighter loads.
- Load Capacity:** Trays designed to carry high-voltage or multiple heavy cables are priced higher due to thicker materials and reinforced structures.
- Length and Width:** Wider or longer trays increase material usage and cost. Standard widths range from 100 mm to 600 mm.
- Protective Coatings:** Hot-dip galvanization, powder coating, or stainless steel finishes add to the cost but improve durability in outdoor environments.
- Accessories and Mounting:** Wall brackets, hangers, and covers for weather protection can add \$5–\$20 per meter to the total installation cost.

**Installation Considerations**

Outdoor cable trays can be mounted on walls using brackets or hangers, ensuring proper ventilation and drainage to prevent water accumulation. Protective covers or fully enclosed trays are recommended in areas exposed to heavy rain, dust, or debris. Quick-connect joints and modular designs ca...
