

Price of fiber optic cable boundary markers

AI Overview

Fiber optic cable boundary markers typically range from \$1 to \$10 per marker, depending on type, material, and customization options.

Pricing Overview

Self-Laminating Marker Tags: These write-on tags, such as the Panduit PST-FO, are commonly used for above-ground or indoor cable identification. Prices vary by supplier, but individual tags generally cost around \$1-\$3 each, with additional delivery charges (e.g., £15.95 per order in the UK) for shipping.

Flexible Fiberglass Line Markers: Designed for outdoor use, UV-stabilized, and suitable for buried fiber optic cables, these markers can also serve as boundary or trail markers. Pricing depends on size, color, and printing options, typically ranging from \$3-\$10 per marker.

Flat Buried Cable Markers: These are durable, permanent markers for underground fiber optic cables. Suppliers like Safetysign.com offer discounts (e.g., 10% off for online sign-up), and prices generally start around \$5-\$8 per marker, depending on quantity and customization.

Customizable Tags and Snap-On Markers: Many suppliers, such as Xpress Tags, provide hang tags, labels, and snap-on markers. Prices are often quoted individually based on order size and customization, but small orders typically fall within the \$2-\$6 per marker range.

Additional Considerations

Shipping and Delivery: Some suppliers charge a flat delivery fee, while others include free shipping for bulk orders.

Customization: Markers can be printed with specific warnings, company logos, or color codes following APWA standards for utility markings.

Durability: Outdoor markers are UV-stabilized and weather-resistant, while indoor tags are designed for readability and long-term labeling. For precise pricing, it is recommended to contact suppliers directly for quotes, especially if ordering in bulk or requiring custom printing. Suppliers like Xpress Tags and Safetys...
