

Price of fiber optic distribution frame for low-voltage electrical wells

AI Overview

Fiber optic distribution frames (ODFs) for low-density installations typically range from \$50 to \$300 per unit, depending on port count, mounting type, and pre-termination options.

Pricing Overview

Low-Density Wall-Mount ODFs: Compact units suitable for low-voltage electrical wells, often supporting 12 to 24 ports, are priced around \$50-\$150 per unit. These are ideal for small fiber counts and limited space, providing basic splice trays and connector management.

Rack-Mount ODFs: Standard 19-inch rack-mount frames with 24 to 72 ports cost approximately \$100-\$250, depending on the number of splice trays, sliding mechanisms, and included adapters (SC, LC, FC) or pigtails.

Pre-Terminated Units: ODFs pre-installed with fiber cables and connectors for quick deployment are slightly higher, typically \$150-\$300, offering faster installation and guaranteed performance.

High-Density or Modular Options: For future expansion, modular ODFs supporting up to 144 ports are available, with prices ranging from \$250-\$500, though these are generally more suitable for data centers or telecom hubs rather than small electrical wells.

Key Considerations

Port Count: Choose a frame that matches your current fiber needs with some allowance for future expansion.

Mounting Type: Wall-mounted ODFs are ideal for low-voltage wells with limited space, while rack-mounted units are better for centralized enclosures.

Pre-Termination: Pre-terminated ODFs reduce installation time and risk of errors but cost more upfront.

Environmental Protection: For outdoor or semi-exposed wells, consider ODFs with sealed or weather-resistant enclosures.

Example Products

Fiberinthebox 19" Rack-Mount ODF: 1U 12 ports to 4U 72 ports, sliding trays, modular adapters, priced around \$100-\$250.

Shenzhen Shouyi Technology 12-Port ODF: Entry-level wall-mount unit, MOQ 10 pieces, low unit price around \$50-\$80.
