

Price of well-known stepped cable trays

AI Overview

Stepped cable trays typically range from \$0.80 to over \$20 per unit for industrial applications, with specialized or used trays costing up to \$25,000 depending on size and configuration.

General Pricing Overview Stepped cable trays are available in various materials such as steel, stainless steel, aluminum, and fiber-reinforced plastic (FRP), which significantly affects pricing. For standard industrial or commercial applications, B2B prices range from \$0.80 to \$20 per unit, depending on material, size, and load capacity. For example, galvanized steel or stainless steel trays are more durable and suitable for heavy-duty installations, commanding higher prices.

New vs. Used Trays New stepped cable trays for industrial use are generally priced between \$2 and \$20 per meter or unit, depending on specifications and supplier. Used or specialized trays, such as those integrated into equipment systems, can cost significantly more. Listings on platforms like Machinio show used trays associated with equipment priced from \$2,621 up to \$25,987, reflecting bundled systems or high-capacity trays.

Low-Cost Options For smaller-scale or under-desk applications, low-price stepped or solid cable trays are available for \$15–\$34 per unit in consumer markets, often made of lightweight steel or plastic and designed for easy installation. These are suitable for office or light commercial use rather than heavy industrial installations.

Factors Affecting Price

- Material:** Stainless steel and aluminum are more expensive than standard steel or FRP.
- Size and Load Capacity:** Wider or deeper trays designed for heavy cables cost more.
- Configuration:** Stepped or custom-shaped trays with bends, drops, or accessories increase cost.
- Supplier and Market:** Bulk B2B purchases on platforms like Alibaba can reduce per-unit cost, while B2C retail prices are higher due to smaller quantities and shipping.
- Installation and Accessories:** Additional components like covers, clamps, and connectors may add to the total cost.

Recommendations For industrial projects, consider bulk purchasing from B2B suppliers.
