

Price per unit of complete distribution box

AI Overview

The price of a complete distribution box ranges from approximately \$10 for basic residential plastic units to over \$2,000 for industrial-grade or smart distribution boxes, depending on materials, capacity, and features.

Residential Distribution Boxes Basic residential distribution boxes, often made of plastic or small steel enclosures, typically cost \$10 to \$40 per unit for standard home use. These units usually include minimal internal components and are suitable for single-phase systems. Installation costs may add \$10–\$30 per unit if professional setup is required.

Industrial and Commercial Distribution Boxes Industrial-grade boxes, designed for higher load capacities and three-phase systems, are more expensive due to durable materials like stainless steel or powder-coated steel, advanced circuit breakers, surge protectors, and busbars. Prices for these units generally range from \$200 to \$2,000 per unit, depending on specifications and customization. Features such as weatherproofing, IP-rated enclosures, and modular designs for future expansion can further increase costs.

Smart and Specialized Distribution Boxes Smart distribution boxes with integrated sensors, communication modules, and remote monitoring capabilities are at the higher end of the price spectrum. These units can cost \$500 to \$2,500 or more, reflecting the added technology and energy management features. Explosion-proof or high-protection-grade boxes for hazardous environments also command premium pricing.

Factors Affecting Price

- Material:** Plastic < Steel < Stainless Steel < Aluminum Alloy
- Capacity:** Number of circuits, voltage rating, and amperage.
- Features:** Smart monitoring, modularity, surge protection, weatherproofing.
- Installation:** Professional installation adds to the total cost.
- Customization:** OEM branding, busbar modifications, and cable entry options c...
