

Price quote for fluorescence spectrometers in the UK

AI Overview

Fluorescence spectrometers in the UK range from approximately £1,500 for basic used models to over £50,000 for high-end, fully automated instruments. Price Ranges and Options Used and Refurbished Spectrometers: Platforms like Machinio and Bimedis offer used Perkin Elmer, Agilent, and Jasco fluorescence spectrometers. Prices for these units typically start around £1,500–£5,000, depending on model, age, and condition. These instruments are often surplus from universities or labs and may require verification of functionality and software updates (Machinio, Bimedis). New Compact and Table-Top Models: Suppliers such as Laser 2000 provide compact PicoQuant spectrometers suitable for teaching or routine lab work. Entry-level table-top models like the FluoTime 250 are designed for time-resolved luminescence spectroscopy and are priced in the £15,000–£25,000 range, offering automated features and versatile software for steady-state and lifetime measurements. High-End Automated Systems: Advanced instruments like the FluoTime 300, capable of picosecond time resolution and phosphorescence measurements, are typically priced above £50,000, reflecting their high precision, full automation, and suitability for research-intensive applications. Educational and Portable Options: Instruments Direct offers Go Direct® Fluorescence/UV-Vis spectrophotometers for educational purposes, which are more affordable, generally in the £1,500–£3,000 range. These units connect via USB or Bluetooth and are suitable for teaching labs or small-scale research. Considerations When Purchasing Application Needs: Determine whether you need steady-state, time-resolved, or phosphorescence measurements. High-end research applications require instruments with picosecond resolution, while teaching or routine lab work can use simpler models. Condition and Support: For used instru...
