

Prices of Components for Household Electrical Distribution Boxes

AI Overview

A standard household electrical distribution box typically costs between \$25 and \$300, depending on size, material, and installation requirements.

Typical Price Ranges

- Basic plastic single-gang boxes: \$6–\$25 per unit, suitable for small residential circuits.
- Standard residential breaker panels: \$75–\$300 including labor for installation, depending on amperage and complexity.
- Metal or weatherproof boxes: \$150–\$300 or more, especially for outdoor or upgraded installations.
- Industrial-grade or stainless steel units: Can cost \$1,000–\$2,000, mainly for high-capacity or specialized environments.

Factors Affecting Cost

- Material:** Plastic is cheaper, while powder-coated steel or stainless steel offers durability and corrosion resistance.
- Amperage and circuits:** Higher amperage panels and more circuit slots increase the price.
- Installation:** Labor costs vary by region and complexity; simple replacements may cost \$75–\$150, while upgrades or rewiring can push totals higher.
- Additional features:** Smart monitoring, surge protection, and integration with building management systems can increase upfront costs but improve long-term efficiency.
- Environmental rating:** Outdoor or weather-resistant boxes carry a premium compared to indoor-rated units.

Buying Options

- Retail stores:** Home Depot and similar outlets offer a range of breaker panels and distribution boxes with varying amperage and configurations.
- Online marketplaces:** Amazon and specialized suppliers provide pre-assembled power distribution boxes for residential and small commercial use, often with multiple outlet configurations and circuit protection.

Summary

For a typical household, a set of distribution boxes (depending on the number of circuits and rooms) can range from \$100 to \$500 for standard plastic or metal units including installation. For higher-end or outdoor-rated boxes, the cost may exceed \$1,000. Al...
