

Recommended Brands for High Beam Modules

AI Overview

Top recommended high beam module brands include Xentec, ICBEAMER, Philips, GTR, OXILAM, AUTOONE, and NOVSIGHT, offering reliable performance, brightness, and durability.

Premium High Beam Brands

- Xentec:** Known for HID xenon bulbs and LED headlight upgrade kits, Xentec offers multiple color temperatures (3000K, 5000K, 6500K) and a wide range of automotive lighting solutions, including LED light bars and fog lights, emphasizing quality and reliability.
- ICBEAMER:** Offers premium xenon HID systems and LED lights with advanced technology and fair pricing, backed by over a decade of automotive lighting experience.
- Philips:** A globally recognized brand, Philips provides high-quality LED and HID modules with proven reliability and consistent beam performance.

High-Performance LED Modules

- GTR:** Specializes in bi-beam LED technologies, including reflector-based bulbs, projector retrofits, and integrated optics. GTR modules are designed for precise chip positioning, optimal beam patterns, and long-term reliability, making them ideal for both older reflector housings and modern projector setups.
- OXILAM H11/9005 LED Bulbs:** Ultra-bright output (up to 82,000 lumens) with a sharp focus beam pattern, aviation aluminum heat sink, and silent cooling fan. These modules offer plug-and-play installation, long lifespan (50,000+ hours), and IP67 durability.
- AUTOONE 9005 LED Bulbs:** Compact, high-lumen bulbs with a 1:1 form factor for easy installation, broad vehicle compatibility, and integrated cooling for sustained performance.
- NOVSIGHT 9005/9006 LED Combo:** Offers up to 50,000 lumens with a 6500K color temperature, integrated heat sink, and long lifespan (~6,000 hours), emphasizing optimized beam patterns and low glare.

Considerations When Choosing High Beam Modules

Housing Type: Reflector vs. projector housings require different module designs for optimal...
