

Relay Protection Management Module

Overview

MiP-PDMS is a web-based, enterprise-level solution designed to help utilities and industries manage protection relay settings through a workflow-based change management system. It also keeps track of all changes made to relay settings through audit logs, helping streamline the audit. Experience the benchmark in grid protection, automation, and monitoring! SIPROTEC 5, built on extensive field experience, offers comprehensive functionalities and device types for modern electrical energy systems. Its modular design and powerful DIGSI 5 engineering tool provide tailored solutions. Our Protective Relay and Intelligent Electronic Devices (IED) Management Solution ensures the highest power system security, reliability, and flexibility standards. The. "This Harmony RXG varistor has a rated voltage of 6V to 24V AC/DC. " "This protection module enables safety to your relay which helps to protect both people and system from electrical shock. Download our detailed product.
