

Relocation of the electrical distribution box in front of the balcony

Overview

Your electrical panel needs at least 3 feet of clearance in front with room for the door to open 90 degrees, keeping your access safe and unobstructed. Expect to pay \$1,500 to \$2,000 to move an electrical panel, with replacement adding another \$1,150 if your. Relocating an electrical panel is a substantial home improvement project that can vastly improve the safety, functionality, and compliance of your electrical system. This modification involves the central distribution point for your home's entire electrical system, which carries lethal voltage. 5 feet (30") wide, 3 feet (36") deep, and 6. d) The panel door must swing open a minimum of 90°, per NEC 110. It provides power from the main energy source and acts like an overseer that detects irregularities and faults by isolating them before. Electrical panel boxes, aka breaker boxes, can be on a wall in an out-of-the-way area of your home. Current National Electrical Codes (NEC) allow none of these locations.
