

Router and fiber optic connection interrupted

Overview

Many fiber internet problems come from dirty connectors or loose plugs, not major faults. Power cycling or restarting your ONT (Optical Network Terminal) often resolves simple troubleshooting internet issues. First, check the basics—look for power issues on your optical network terminal and inspect all cables for visible damage. This guide will walk you through diagnosing and resolving common. There's likely something interfering with your internet connection if it's flickering in and out like a dying lightbulb. These cables are made of glass or plastic fibers that transmit data as light signals. By shedding light on these common fiber internet problems and offering insights into preventative measures and advanced troubleshooting steps, we aim to empower network. I have fiber internet through Brightspeed (who is using CenturyLink's equipment AFAIK) For over a month now, my internet has constantly been disconnecting every 5-30 minutes and goes down for a few minutes every time.
