

Server Cable Management Mount

Overview

The D-ring rack mount cable manager and the finger duct rack mount cable manager are two of the most common solutions for server rack cable management. Cable management systems come in several types: raceways contain cables in rigid channels, horizontal managers segment connections at specific rack heights, vertical panels organize cables along the rack's length, and D-rings secure cables with minimal obstruction. Cable Managers for Guiding and Organizing Cabling When organizing cables in a network setup, two main types of cable management tools are commonly used—horizontal and vertical cable managers. Keep cables organized and improve airflow. Both 10-32 and 12-24 mounting screw kits are included enabling it to be mounted on either thread pattern.
