

Southeast Asia AI Computing Servers

Overview

Southeast Asia data center capacity is on track to triple by 2030 on AI demand. Malaysia and Indonesia anchor the new ASEAN compute belt. 2. Artificial intelligence (AI) is fuelling an unprecedented surge in data demand – and Southeast Asia is not yet ready to meet this challenge. Across industries such as manufacturing, mobility, and logistics, next-generation AI applications are starting to replace traditional sensors with. Southeast Asia now hosts more than 2,000 data centres across Indonesia, Malaysia, Singapore, Thailand, Vietnam and the Philippines (Ember, 2026), with hundreds more under construction and over a thousand in planning. From Singapore's hyperscaler campuses to Malaysia's semiconductor labs and. Includes a new region (Malaysia Central) and an AI hub in Kuala Lumpur. 2B investment over 15 years for AWS infrastructure in Malaysia.
