

Trough-type flame-retardant fiberglass cable tray

Overview

● Trough type cable tray: a fully enclosed cable tray suitable for laying control cables of computer cables, communication cables, thermocouple cables, and other high-sensitivity systems. It has good shielding interference and protection effect on control cables in heavily. Fiberglass cable trays, also known as fiber-reinforced plastic cable trays, are composite cable support structures made of glass fiber reinforced with an unsaturated polyester resin matrix through pultrusion, molding, and other molding processes. It is manufactured from fiber reinforced polyester or vinyl ester resin so it has high corrosion resistance, long. FRP cable tray is an automated production process in which untwisted glass fiber and other continuous reinforcement materials, polyester, flame retardant materials, surface mats, etc.
