AI Overview

The NETGEAR Nighthawk RS700S and FRITZ!Box 5690 are top fiber-optic routers capable of handling multi-gigabit speeds with advanced Wi-Fi 7 or Wi-Fi 6 technology. Key Features of Fiber-Ready Routers To fully utilize fiber internet, a router should meet the following criteria: High-speed capability: Support for at least Gigabit Ethernet (1000 Mbps) to match fiber bandwidth. WAN port for ONT: A dedicated port to connect to an Optical Network Terminal if the router lacks an integrated fiber modem. Advanced wireless technology: Wi-Fi 6 or Wi-Fi 7 for faster wireless speeds and better coverage. Multiple LAN ports: For wired connections to desktops, smart TVs, or NAS devices. Coverage and device support: Ability to cover large areas (up to 3,500 sq. ft.) and support many devices simultaneously (up to 200 devices).
